

1. Day 1

-The Learning Objective

Students will get introduced to variables and understand that Letters are also represented as numbers that are unknown

-Introduce each other

-Understand what is Algebra

-Warm-up:

I will ask questions like If I have an unknown number and add 3, I get 5. What was the unknown number?

-Lesson(Variables and Algebraic Expressions)

-Kahoot

2. Day 2

-Introduce the next topic

-Warm-up from last topic

-Lesson (Linear Equations and solving one-step equations)

-Kahoot

3. Day 3

-Introduce the next topic

-Warm up from the last topic

- Lesson (Linear Inequalities and Word Problems)

-Kahoot

4. Day 4

-Introduce the next topic

-Warm up from the last topic

-Lesson(System of Equations and Graphs)\

-Kahoot

5. Day 5

-Introduce the next topic

-Warm up from the last topic

-Lesson (Exponents and Radicals and Polynomials)

-Kahoot

-Thank the kids for their attention and their work ethic.
